

# ECOFILIA

BRINGING AI-POWERED CLIMATE INTELLIGENCE  
TO TRADITIONAL CONSULTING

## About us

**Ecofilia is a consulting firm bringing AI-powered climate intelligence to help organizations accelerate sustainability reporting, policy and data analysis, project monitoring & evaluation, and ESG action.**

By CLIMATE INTELLIGENCE we mean combining the right climate and sustainability data with the right AI to guide your sustainability processes. We've already built a robust knowledge base of climate, ESG, and policy content, which we adapt and expand based on your specific goals, documents, and context. This is how we deliver smarter, faster and more scalable results.

## SMARTER insights

Our AI engine has already processed thousands of climate, ESG, and policy documents—so it doesn't start from scratch. It uses advanced retrieval (RAG) to understand your queries in context, analyze the right information, and deliver insights that are accurate, aligned with global standards, and ready to use.

## FASTER results

Generate sustainability reports and analysis in minutes—not weeks—by automating what used to be manual, repetitive work. Spend less time chasing data and more time on what really matters—without compromising quality, depth or compliance.

## SCALABLE deliverables

Get living deliverables you can reuse, update, and adapt so your work stays relevant as data, goals, or frameworks evolve. This means your sustainability work keeps its value over time—and gets better, not outdated.

# What we offer

---

## Automated Sustainability Reporting

Generate reports aligned with global standards like GRI, CDP, ISSB, TCFD and multilateral development banks—faster, easier, and with less effort.

## Monitoring, Evaluation & Indicators

Automate the tracking of sustainability KPIs, program performance, and climate targets. Get AI-powered dashboards, making it easier to visualize results, measure impact, and drive better decisions.

## Sustainability Knowledge Hubs

Access our open Sustainability Library or build your own AI-powered hub to centralize knowledge and accelerate informed decisions.

## Rapid Policy & Strategy Analysis

Use AI to quickly analyze climate plans, ESG strategies, and policy documents, extracting key insights in minutes to support data-driven decisions and strategic planning.

## Data and Document Intelligence

Turn complex documents into structured, actionable data, so you spend less time searching and more time acting.

## Tailored AI Solutions for Sustainability

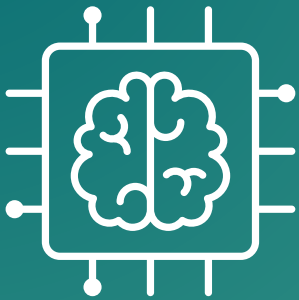

We co-create AI-powered tools tailored to your sustainability needs, augmenting your teams with scalable, smart capabilities.

# How do we do it?

## AI-powered Climate Intelligence

### Knowledge Engine Built on RAG

We've developed a Retrieval-Augmented Generation (RAG) system tailored for climate and sustainability. By processing and indexing thousands of policy documents, reports, and datasets, we enable AI to generate accurate, context-aware outputs grounded in real-world data.

### Smart Integrations

We combine large language models (LLMs), machine learning (ML), natural language processing (NLP), and vector search to automate complex workflows—from document analysis to reporting. We integrate with internal and public sources to enhance speed, reduce manual work, and deliver insights professionals can trust.

### Secure and Responsible Tech

All documents and information are stored with double encryption ensuring they remain secure at all times. We do not use your data to train language models. Clients retain full ownership and control over their data and results.

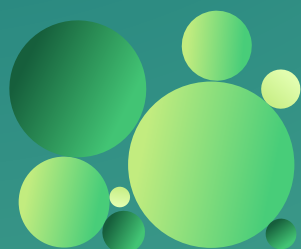

# Our Positive Impact Strategy +

EFFICIENT - INCLUSIVE - ACCOUNTABLE

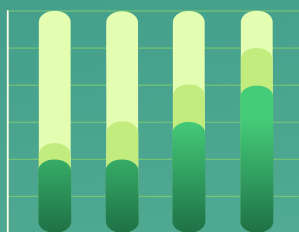

## Minimizing AI's Carbon Footprint

We actively optimize our AI pipelines to reduce compute waste, prioritize energy-efficient architectures, and adopt low-energy open-source technologies for responsible, climate-conscious innovation.

## Free Access to Climate & Sustainability Knowledge

We created an open-access, AI-powered Sustainability Library to democratize access to climate policy, finance, and ESG documents—already trusted by 70+ students, researchers, consultants, and public sector professionals

## Investing 1% in Sustainability

We commit to reinvesting 1% of Ecofilia's profits in climate and sustainability initiatives—supporting grassroots projects, climate education, and local innovation.
